

A photograph of a white, modern-style toilet. The toilet is positioned against a textured blue wall. To the left of the toilet, a dark vertical panel is visible. A small potted plant sits on top of this panel. To the right of the toilet, a roll of toilet paper is mounted on a holder. The lighting is soft, creating a clean and sophisticated atmosphere.

# ABOUT JOHNSON INTERNATIONAL

## A TOUCH OF CLASS

Johnson brings to life a new range of bathroom products which takes design and functionality to the next level. Imagine a world where art meets functionality; a world where splendour integrates with engineering. A product so remarkable, that it finds admirers at every corner of the world. Such a range is truly International by design and International by name.

With an experience of over a century, the Johnson legacy has left a mark right from the Royal Palaces across the world to the select few consumers with an impeccable taste. Today, this legacy lives through the contemporary designs of Johnson International.

## Thane Plant Setup in 1959

# JOHNSON HERITAGE

## OUR LEGACY

Johnson has been one of the foremost innovators in the field of ceramic manufacturing. Our history traces back to 1901 in UK. Our journey in India started in 1958 and H&R Johnson has been the pioneer of Tile Manufacturing since then. With a rich legacy and quality offerings H&R Johnson has been the most popular and leading tile brand for close to 6 decades now. We have always dedicated resources towards researching architectural and Interior designing themes and trends. This effort of ours include international tie-up with leading design houses.

# R&D

Innovations have always been a core aspect of our Company, and have been instrumental in helping us introduce several unique products based on our understanding of consumer needs as well as the latest technological trends Globally.

With vast experience and in depth knowledge in ceramics, in-house R&D and captive production of many components like Moulds, Cores & Components. These are few of the reasons that we own a position of leadership in the category of Home Solutions.

# RAW MATERIAL

Quality is both inherent and visible aspect in sanitaryware and faucets, something that we pay great attention to, for offering the best products to our customers - we use the best raw materials most modern technology and equipment and deploy strict quality controls in the creation of each product.

# PRODUCTION PROCESS

## SANITARYWARE

World Class quality of products is achieved through impeccable attention to detail - right from meticulous selection of Raw Material, and maintaining the right composition. Precision continues through perfect casting process and finally through accurate firing temperature.

**Modelling**

To give shape to perfect sanitaryware, the mould is carefully crafted by Johnson Ceramic Experts.

**Casting**

Our signature designs take shape through casting in a controlled environment.

**Glazing**

A fine layer of our unique glaze formula is sprayed on the casted body.

**Firing**

Accurate firing temperature of the High Tech Kiln gives Uniform Shape and Shining surface to the product.

### Core Making

Flawless Cores facilitate a uniform internal structure of Faucets.

### Machining

Machining is carried out using high precision equipment that gives longer life and Durability to faucets.

### Casting

High quality brass is casted in poured in moulds that ensures uniform casting of brass faucet body.

### Buffing

Fine Curves and smooth surface is achieved through careful buffing.

## FAUCETS

Incredible precision and control towards flow of water is a result of cutting-edge engineering in Faucet design. Every aspect of production from core making to electroplating is carried out in a controlled environment to ensure a perfect output.

### Electroplating

Dazzling finish of Dura Shine is a result of our special Chrome electroplating technique.

# QUALITY

Every product is carefully inspected by skilled Quality control team. Post inspection, all products undergo testing using high-tech equipment to meet international standards.

What separates an average product from a perfect one is the high standards of acceptability. At this stage a product is finally worthy to carry the Johnson International Seal.

JOHNSON International products are manufactured under tight Quality controls in line with our commitment to deliver quality products and services to the user. We not only provide an unmatched warranty for 12 years, but also ensure that the entire warranty claim process is extremely simple. We are the only company in this category to provide free replacement of parts. Our efficient service team is spread across the country to provide timely service to the users. (Please refer Warranty card inside the packing box for details).

# 360° FLUSHING

Innovative 360° flushing with side & bottom jets which created a powerful swirl for flushing out both solid & liquid waste efficiently.

# PRODUCT FEATURES

## SANITARYWARE

With open rim there's no place for germs to grow, making it more hygienic & easier to clean. 3/4.5 litre dual flush technology, uses up to 50% less water than conventional Toilets.

Easy to clean

# PRODUCT FEATURES

## SANITARYWARE

Slim Heavy Duty UF Seat Cover is Aesthetically Superior, Long lasting, Scratch resistant & Easy to clean. A gentle tap is all it takes to close the Seat Cover with pin drop silence.

High Quality SS304 Quick release hinges enables customers to easily remove the seat cover and clean the toilet perfectly.

Smooth zircon opacified glaze that resists build up of stains due to usage.

**GEBERIT**

To ensure the best flushing standards and water saving, Johnson International products come fitted with GEBERIT Fittings which are globally renowned for their Quality and Precision.

Ideal depth of water seal prevents water from Splashing & Odour, keeps bathroom Fresh and Hygienic.

Our wall hung comes with concealed fixations which gives better aesthetics and ease of installation.

# PRODUCT FEATURES

## FAUCETS

### Precise Control

High Tech Cartridges ensure you have smooth and precise control over flow of water.

### Pure Brass

When it comes to water only the best quality of brass can ensure that water remains safe for daily use.

### Dura Shine

Johnson International's Dura Shine chrome plating, ensures a long lasting dazzle finish.

### **Thermostatic**

Inbuilt Thermostatic Control Valve ensures uniform flow and temperature is maintained irrespective of variation of input pressure and temperature.

### **Tilting Aerator**

The angle of the water stream can be adjusted directly at the aerator – simply by moving the adjustable tilting plate.

Available in - Burgos, Cannes & Banco

# CARE & MAINTENANCE

## **Chrome Plated Products**

Dirty Taps cause bathrooms to appear dingy and neglected. Exposure to dirt, body oils and soap cause taps to develop a filmy exterior. Minerals in hard water combined with soaps and shampoos can form a cloudy scum on taps. The longer residue remains on taps, the more difficult it becomes to remove. Frequently cleaning taps maintains their aesthetic appeal and prevents unsightly buildup. Use basic soap solutions to effectively clean and restore a taps.

## **Special Care**

Robust cleaning methods and aggressive cleaning agents may not just damage surfaces, they can also affect the inner workings of the product.

Avoid mistakes when combating limescale and dirt: if incorrect treatment leads to damage, this is excluded from the warranty.

Never spray cleaning agents directly onto mixers or showers. Instead, spray cleaning agent onto a soft cloth and use this to wipe the surface. Thoroughly rinse mixers and showers after cleaning with clean water.

Do not use any cleaning agents containing hydrochloric acid, formic acid, chlorine bleach or acetic acid, as these can lead to significant damage.

## **Please follow below steps:**

Fill a spray bottle with undiluted white vinegar. Spray the vinegar generously onto the faucet. Let the vinegar remain on the faucet for 5 minutes to loosen soap scum, dirt and mineral deposits.

Wipe the faucet with a paper towel to remove loose grime.

Inspect the faucet for remaining stains, scum or grime. If more cleaning is needed, fill a plastic bowl with 1/2 cup of baking soda and 1/4 cup of white vinegar. Thoroughly mix the ingredients to form a paste with the consistency of toothpaste.

Spread the paste over the faucet, using a spatula. Keep the paste on the faucet for 10 minutes.

Scrub the faucet with a nylon scouring pad to loosen remaining debris.

Dampen a soft cotton rag with warm water. Wipe the damp rag over the faucet to rinse away the paste and loosened debris.

Wipe the faucet with a terry cloth towel until completely dry.

### **Glazed Sanitaryware Products**

Sanitaryware products are made from vitreous china. The lid and seat may be made from this material, plastic or other materials. Some toilets have a special glazed finish that helps keep the toilet cleaner longer. Whether your toilet has special glaze or not, cleaning procedure has to be followed. Do it frequently (sufficient frequency depends on usage) and use appropriate cleaning products.

#### **Please follow below steps:**

Put on protective eyewear as toilet cleaning chemicals can be very caustic. For the same reason, as well as sanitary reasons, wear rubber gloves. Open a window, if possible, for ventilation. At the least, keep the bathroom door open as cleaner fumes are toxic.

Open a bottle of non-abrasive toilet cleaner. Point the top just beneath the rim of the inner part of the toilet bowl. Squirt the product all around the inner rim.

Leave the room and let the cleaning product have ample time-check the label-to work on the toilet. If you have pets or young children in the home, secure the bathroom door to prevent their contact with the cleaning chemical.

Use a toilet brush to scrub the inside of the toilet bowl thoroughly. Close the lid (to prevent splashing the chemical) and flush the toilet to rinse out the bowl.

Wet a sponge in warm water. Apply either a general bathroom cleaner or antibacterial soap to the sponge. Use this to wash the seat, the lid and other areas of the toilet.

Rinse out the sponge and wipe over the outer toilet surfaces again. This is to remove cleaner residue. You may dry the toilet's exterior with a soft towel, if you wish.
