SANITARYWARE

Johnson GermFree Sanitaryware.

A marvel of SilverNano technology.

Johnson presents the all new range of sanitaryware with unique anti-bacterial property. An amazing mélange of aesthetics and hygiene, Johnson's Germ Free sanitaryware is an ultimate outcome of the breakthrough SilverNano technology. The range is coated with special Nano Ceramic glaze comprising of Silver Nano particles (ions) that inhibit multiplication and growth of bacteria, thus keeping your sanitaryware free of bacteria. Furthermore, the range offers Germ Free Soft Close Seat Cover and Flushing Cistern as well. Johnson has truly created a zone of protection for the health and safety of your family.

What is Nano technology and SilverNano particles?

Nanotechnology is a rapidly growing science of producing and utilizing nano-sized particles that measure in nanometers (1nm = 1 billionth of a metre). One nano material that is having an early impact in healthcare products is nano-silver.

For thousands of years Silver has been used as an ingredient in alternative medicines, such as Ayurveda and is known to have anti-bacterial and anti-fungal properties. It is known & scientifically proven that SilverNano ions can effectively sterilize over 650 types of bacteria. The SilverNano particles typically measuring 25nm have a relatively large surface area due to their tiny particle size. This increases the contact area with bacteria or fungi, vastly improving its bactericidal and fungicidal effectiveness.

The SilverNano when in contact with bacteria and fungus adversely affects cellular metabolism and inhibit cell growth. The SilverNano suppresses respiration, basal metabolism of electron transfer system, and transport of substrate in the microbial cell membrane. The SilverNano inhibits multiplication and growth of those bacteria and fungi which cause infection, odour, itchiness and sores.

Your Hygiene. Our Concern.
